# SKIRMESH

Airsoft. Connected.
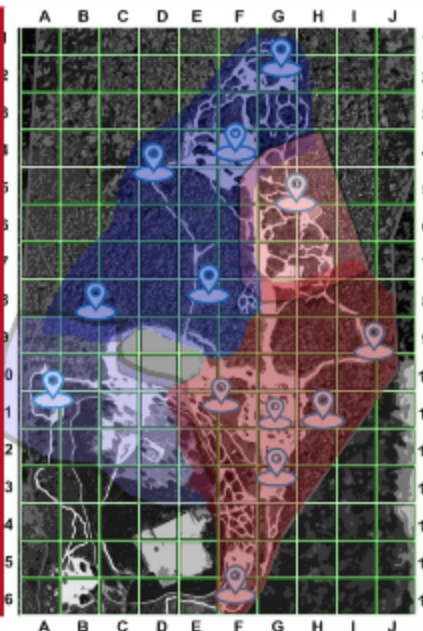

"The new tech was awesome!"

Add easy-to-deploy, durable, sensor, and cloud-based elements to your Field for a more realistic and enhanced experience. Players interact with our system using RFID bracelets to capture points, rescue downed pilots, plant bombs, medic, and other necessary gameplay capabilities. Gameplay is overlaid onto your field map and uploaded to the cloud real-time so Commanding Officers, players, or anyone interested can watch the action live!

Enhanced Safety

Fan Favorite Missions. Customized.

New Customer Engagement Channels

Get Equipped!

01 Design Session
Skirmesh will host you and your team for a Zoom call design session and introduction. We will discuss your field size, needs, interests and the best way to equip your field!
